

# FREEDOM!

**MC E-MODEL** 3-WHEELER • 4-WHEELER

# Make your way with **Mini Crosser...**

This little electric scooter is ideal for both indoors and out – it is incredibly nimble and easy to operate. On a single charge it can travel 40 km at a speed of up to 15 km/h on a firm surface, such as a pavement or cycle path.

Mini Crosser E-model can be recharged from an ordinary power socket. On long trips or away from home, the charger can be taken along as well. Or you can buy an extra set of batteries. As standard, Mini Crosser E-model is equipped with cycle basket, rotating seat and maintenance-free batteries.

For an extra charge, a stick holder for two walking sticks, walking frame holder, puncture-free tyres and a rear basket are also available.

Mini Crosser E-model is available in a three-wheel or four-wheel version. The three-wheel version has a very small turning radius and is thus especially suitable for home use. The four-wheel version has greater stability but also a larger turning radius. The four-wheel version is recommended for use on uneven terrain.

*Control panel.* ►

1. Speed regulator
2. Battery indicator
3. Key
4. Forward/reverse levers with power control
5. Horn button
6. Light switch
7. Emergency flasher
8. Direction indicator
